c. Analysis: Overall, Vista has average to slightly above average performance compared to surrounding schools. Vista has also maintained this academic performance for the last three years. During that time, Vista had strong enrollment. There is no reason to expect that Vista's academic performance will dramatically change, thereby negatively impacting enrollment. Thus, we determine that unless there is drastic change in Vista's academic program or instruction, Vista's academic performance is adequate to maintain its enrollment plans.

Mission:

Vista's mission is to create an academic enterprise that stands unique among all schools. We are dedicated to providing students with an individualized and unparalleled educational experience through involvement with the arts, language development, and the improved use of information and technology tools.
