

SCSB Innovation Goal

April 15th, 2020

Background

- Original Goal
 - By March 2021, an innovations survey of all Utah charter schools will have been created, conducted, and received a 50% response rate. These survey data, the foundation for a future Innovation plan, will be analyzed and presented to the Utah State Charter School Board Innovations Committee who will then present to the Utah State Charter School Board by July 2021.
- SCSB Decision
 - Proposed new goal

New Goal-Draft

- Mission
 - Authorizing and Oversight
- SMART Goal
 - Goal v. Plan
- Innovation
 - Different for the sake of different
- Intentional Authorizing
 - 25-26 Cohort
- Oversight
 - 12 (top) or 22/100 (bottom)
 - 14% of schools in the state
 - Where do we prioritize our efforts?

- The SCSB portfolio of charter schools will exemplify Utah's commitment to providing students with unique pedagogies and evidence-based practices that will ensure they receive the best education possible. For the 25-26 cohort, the SCSB will begin requesting specific models and practices as part of new school applications. Further, the SCSB will begin refining its portfolio beginning in May 2023 to ultimately improve the rate of SCSB schools in the top 100 schools in the state.
