

Enrollment and Retention Report for Schools Authorized by the State Charter School Board

Definitions

Enrollment: The number of students enrolled at a school as of October 1 of that academic year.

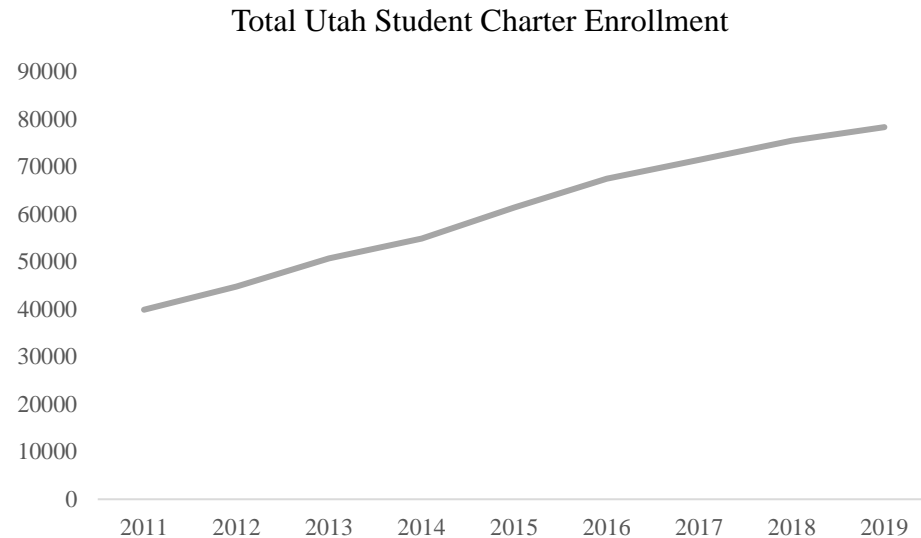

Retention: The percentage of students who remain from year-to-year, or re-enroll the following year, at the same charter school.

Annual Indicator: The minimal expectation for SCSB schools is a retention rate of 60% or greater, or no more than 7% below the prior year. If the retention rate does not meet this threshold a Research and Review process is initiated for that school.

Comprehensive Review Indicator (CR): The five-year average retention rate is greater or equal to 75%. If a school does not meet this five-year average a Research and Review is triggered but does not immediately mean an issue needs to be addressed.
