

Material Change to Charter: Rockwell Charter High School

May 12, 2022

Background

They did not participate in the Covid Distance Pilot that has been available for the past two years, and as such would not qualify to be considered under that.

Rockwell has run an online/distance program before, where they contracted with Harmony Education Services. That program also sought to offer a type of “hybrid” program similar to what CGA has built. It appears Rockwell’s current proposal will not contract with a third-party vendor but will run the program inhouse. This would constitute a material change to their charter agreement.

Request

- Online options would consist of part-time licensed teachers and a part time licensed counselor hired to run the online classes and maintain contact with their students.
- Students would have options to the number of classes they take online. They can focus 100% online to splitting time online and attending in person.
